Phone: +51 951 139 483  
Location: Calle Los Bambús N°  
Mz.40 Lt.06 C.P Puerto Bermúdez

### PROFESSIONAL SUMMARY

---

Software Engineering student with experience in backend development, databases, and technical monitoring of systems, complemented by practical knowledge of technical support, hardware, and networking. Skilled in diagnosing and resolving technical issues; assisting with equipment maintenance, connectivity, and IT systems; and developing and maintaining software services. Results-oriented, responsible, and adaptable, with the ability to work in both operational and software development environments.

### PROFESSIONAL EXPERIENCE

---

#### Software Engineer, La Base Cowork

January 2024 – June 2025

- Developed modular backend services using Node.js, Express, and TypeScript.
- Integrated PostgreSQL databases, improving query efficiency by up to 35%.
- Implemented controllers and services following the Vertical Slice architecture.
- Designed RESTful endpoints and technical documentation using Swagger.
- Monitored the technical progress of each module, tracking versions and development milestones.
- Assisted in resolving technical issues involving systems and databases.

### EDUCATION

---

#### Software Engineering with Artificial Intelligence

March 2022 – June 2025

SENATI – National Service for Industrial Work Training

- Specialization in Software Architecture and Intelligent Systems.
- Thesis project: “Automated Management System with Intelligent Data Analysis.”

#### Completed Secondary Education

Puerto Bermúdez | March 2017 – December 2021

PPM Educational Institution No. 34228

- Successfully completed five years of secondary education.
- Participated in academic activities and school innovation projects.

### ADDITIONAL INFORMATION

---

**Programming languages:** TypeScript, JavaScript, Python, SQL.

**Frameworks and tools:** Node.js, Express, FastAPI, Prisma, Docker, GitHub, React, Notion.

#### Technical skills:

- Backend development and RESTful APIs
- Relational database management
- Process automation
- Basic hardware and software technical support
- Networking and connectivity knowledge
- Version control and technical monitoring of systems
